Ιντεγρωτιν γ Πραχτιχολ

- Team members:
 - Jorge Andrade (Globus)
 - Yan Bingheng (OMII)
 - Juan Carlos Díaz Vélez (Condor)
 - Dukyun Nam (Globus)
 - Thomas Prokosch (gLite)
 - Ana-Maria Oprescu (OGSA-DAI)

Ουρ αππροαχη

- Divide and conquer
 - Assign different grid technologies to member but also tried to help each other with problems
- Condor:
 - Several jobs with x,y randomized around hint
 - Start with large radius and coarse stepsize
 - Then decreasing radius and stepsize
- Glite:
 - We have all code blocks in place
 - Accessing the database was straightforward
- Globus:
 - Same as condor
- OMII (GridSAM):
 - Luck!!
- OGSA-DAI:
 - Bad luck

- Problems

- We needed to have more people working on gLite)
- Condor cluster was under heavy load
- Group decided to move downstairs but not everyone had laptops so we ended up isolated from each other for much of the time.
- INCORRECT DATA
- Condor pool (again)
