

ISSGC07 Integrating Practical

Team 8

Jonathan Dumm (Condor)
P-O Östberg (Globus)
Eva Huan Yan Wu (OMII)
Xavier Amador (gLite)
Xinqi Wang (Condor & gLite)

- Team composition
 - mixed backgrounds
 - unfortunate circumstances (lost team-mate, globus)
- Technologies used
 - Condor - quick and easy
 - Globus - quick and efficient (bypassed the condor pool)
 - OMII - slow and brutal
 - gLite - don't ask
- Strategies employed
 - work split evenly among team members
 - team members re-allocated as work progressed
 - adaptive search patterns used

- Condor - 5/5
 - quick hits, plaque reading difficult
 - automated search, manual refinement
- Globus - 5/5
 - more than 1000 searches on the (faulty) first version
 - scripts and parameters re-used on the real data
 - adaptive search patterns, manual plaque reading
- OMII - 3/5
 - time consuming
 - searching easy, coding complicated
- gLite
 - unable to access the data
 - frustrating and confusing information

Conclusion

Analysis

Results

Conclusion

- Interesting demonstration of differences in techs
- Most of the time spent fiddling with parameter values
- Frustrating lack of documentation for tools
- Access to raw data would have been appreciated
- ...but still sort of fun! :-)
